Not Independent

We do not charge you a fee for our advice on risk insurance policies as we are paid a commission by the product provider. Our advice on risk insurance is therefore not independent, impartial or unbiased.

The financial advice process.

Where we provide personal advice, we will listen to you to understand your objectives and circumstances. We will also ask questions to make sure we provide advice which is in your best interests.

When we first provide personal advice to you it will be explained thoroughly and documented in a Statement of Advice (SoA) which you can take away and read.

The SoA will explain the basis for our advice, the main risks associated with the advice, the cost to you of implementing the advice, the benefits we receive and any conflicts of interest which may influence the advice.

For administration platforms, managed fund and personal risk insurance products we will provide you with a Product Disclosure Statement. This contains information to help you understand the product being recommended.

At all times you can contact us and ask questions about our advice and the products we recommend.

You can provide instructions to us in writing, via phone or via email. In some cases, we may require you to provide signed instructions.

We may provide further advice to you to keep your plan up to date for changes in your circumstances, changes in the law and changes in the economy and products.

If we provide further advice it will typically be documented in a Record of Advice which we retain on file. You can request a copy of the RoA document at any time up to 7 years after the advice is provided.

Our Investment Philosophy

Our investment philosophy is to seek to align your unique investment timeframe, life-stage, experiences, knowledge, needs, emotions, expectations, tax structures plus environmental and general concerns with investments which can achieve your desired income and/or growth outcomes.

Our investment beliefs are:

- To invest in quality assets which can be sold when the investment time duration expires.
 - To take lessons from history balanced with a forward-thinking approach.
- To be risk aware by recognising that investors are risk averse, and that risk aversion is likely to be different at various life-stages and that investment market risks, in one form or another, are ever-present.
- To recognise that volatility (asset price variability) in some (mostly share and currency) markets is quite normal, works both ways and is best managed by adopting a long-term view.
- To reduce overall volatility by utilising diversification over assets, managers, and markets as a tool to even out returns.
- To use asset allocation, which is dividing investable funds across more than one asset class, to manage risks, goals, and investment time frames.
 - To understand the importance of capital protection for some investors.
 - To be investment cost-conscious but not cost-obsessed.
